- Freedom to choose your authoring system

FEATURES

- Supports InDesign CS4 & CS5
- Converts QuarkXPress v3.3 - v8.x
- Simple to install
- Quick & easy to use
- Swift return on investment

PRODUCT OVERVIEW

Q2ID (QuarkXPress to Adobe InDesign) is an Adobe plug-in for InDesign. It provides a quick, easy and affordable method for you to migrate all your QuarkXPress content into a new Adobe InDesign document. The conversion is enabled with a single click using InDesign File->Open. No more re-creating documents from scratch, Q2ID gives you a big head-start.

Q2ID provides intricate details of the content within the QuarkXPress document to be instantly re-created within InDesign. Items converted from Quark include: page positioning, color models, fonts and styles, images, and text attributes as well as tables, layers, blends, runarounds, linked text boxes & anchored boxes, pantone colors and other color models.

The Q2ID (QuarkXPress to Adobe InDesign) document conversion technology will save you countless hours of scanning, re-keying and formatting. This product converts and transforms files created from within QuarkXPress on either the Microsoft Windows or Apple Macintosh OS, into an Adobe InDesign file, which then can be opened on both platforms.
